

MARINE AND SHIPYARD

INDUSTRIES IN BATAM

PROLOGUE

Shipyard industries are very important to this region, especially since Batam is located just southeast of the Malacca Strait, the busiest shipping lane in the world. With the huge need in marine activities in Indonesia, due to the size of the archipelago, this industry has also played an important role in many sectors. Batam recognized the significant value of the industry, and initiated growth in the shipyard industry and thus, the industry has contributed an influential development towards the industrial growth in Batam for the past two decades.

Many of shipyard industries are situated at Tanjung Uncang, located on the Western part of Batam Island is a sub area of the Sekupang development Area. Tanjung Uncang is allocated for shipbuilding and shipping industry in Batam, with marina facilities and ferry terminal located in the neighborhood. Located very strategically with an area of 6,789 hectare, with a coastline of 18,250 meters, and depth of 6 to 18 meters, Tanjung Uncang has become a shipyard heaven.

The shipyard industry in Batam has gained confidence from other countries, such as companies from Japan, South Korea, Malaysia, Singapore, UK and the Netherlands. These have shown great advancement in the area, taking great advantage of the short distance to Singapore (20 km away) and its limited coastline. With the growing interests for marine industry to expand and relocate here, Batam will be able to serve and support the marine industry in Singapore and elsewhere in providing a more attractive and competitive environment for business.

DELTA SHIPYARD

PT. Delta Shipyard is a testimony to the vision and active participation of the private sector in Indonesia's quest to become a major player in the global maritime industry. We are currently completing the setting up of an integrated shipbuilding and shiprepairing facility.

We are making every endeavor to emerge as an internationally competitive yard and facilitate the emergence of Batam Island as a dominant ship building and ship repair centre of the region. Our senior management has a long record of experience in the maritime offshore industry.

The shipyard complex is located on Panaran Dapur 12, Tanjung Uncang, Batam Island, Indonesia. PT. Delta Shipyard owns and operates a shipyard in Batam in Indonesia, which we use as a base for our fleet deployed and for in-house ship building, conversion, repair and maintenance.

We also provide ship conversion, repair and maintenance services to third parties.

PT. Delta Shipyard has the expertise and experience to repair a diverse range and capacity of vessels in the marine and offshore sector such as :

- Oil tankers, Chemical tankers.
- Dredgers, General cargo vessels.
- Tug boat, supply boat.
- Offshore support vessels, and barge.
- Accommodation barge.

LOH & LOH CONSTRUCTION INDONESIA

PT. Luo Shipyard was incorporated in Batam Indonesia, for one very special purpose - COST EFFECTIVENESS. The management of PT. Luo Shipyard had foresee and prepare for any possible economical crunch during the early nineties, which therefore decided to invest immediately to a locality that offers great potential yet low in cost.

Batam was chosen due to the Triangle Regional Development that comprising of Singapore, Johor and Riau. A tax-free zone environment greatly contribute its value.

Main costing of workforce and land cost are relatively low thus allow us to construct and complement our tariff-price to a level where most shipyards in this region find hard to compete.

We specialise in the area of Ship-repairs, Barges and Tugs, Construction and Fabrication needs. Technical and Productivity qualities are not compromise at all, due to fact that we are always working very closely with International acclaimed bodies, namely NKK, ABS, GL, BV, Lloyds, etc.

Professional Consulting in provided at any requests and we are ever ready to visit customers within this geographical region anytime. Here, we would wish to convey our full dedication and commitment to complete all work given at the agreed stipulated time-frame.

Marine and Shipyard Industries in Batam

SENTEK INDONESIA

PT. Sentek Indonesia was first introduced as PT. Sentek Marine & Trading in year 2000 by Mr. Pai Kheng Peng, the managing director. Land reclamation and civil construction works commenced shortly after. The building of the infrastructure, such as workshops, the dry dock, the wharves, major equipment, etc, was fully completed within a few year. Base on our unique skill, experience and remarkable effective work control system, rapidly, we have expanded our shipyard. Nowadays PT. Sentek Indonesia has been developing from a small size shipyard to one of the biggest shipyards in Batam island.

Sentek Indonesia 's parent company is Sentek Marine & Trading Pte Ltd, Singapore . Sentek Marine & Trading was incorporated in 1993 as a limited exempt private company with its principal activities in bunkering.

Located at Tanjung Uncang, Kampung Becek of Batam Island , the PT. Sentek Indonesia is situated on 18 hectares of prime land. PT. Sentek Indonesia actively involved in new construction and repair of tugboats, barges, floating docks, also provide chartering service of barges, and launching service. Our quality service, dedication and comitment has help us grow tremendously over the year. As time being, we are in the process to expanding our workforce as well as our facility to cater for our future business growth.

SUMBER MARINE SHIPYARD

PT. Sumber Marine Shipyard was established on 6 July 2011 and is located at Jl. Brigjend Katamso KM 5, Tanjung Uncang, Batam. It is a strategic location, just by the main road of Jl. Brigjend Katamso, Tanjung Uncang, the busiest industrial area in Batam City. It also equipped with jetty which allows for easy loading and unloading. With our strategic location and our jetty facilities, logistics and mobilization can be accomplished with ease.

With a proximity of only 20 km from Singapore, the island can be reached by ferry in less than an hour. It has been declared a Free Trade Zone in 1989 and since then has been developing into a major industrial area.

PT. Sumber Marine Shipyard is currently engaged in Ship Building, Ship Repair, and Conversion of vessels such as CPO, Tug Boat, Cargo Vessel, Cement Carrier, and so forth.

BUANA CIPTA MANDALA

PT Buana Cipta Mandala, also known as Buana Shipyard, works in new-building and repair of vessels. We base our operations in Batam, Indonesia within a 16-hectare area in Kabil. Indonesia has long been known for its strong maritime power and shipping industry. It is what drives our company to give our best for our customers and, in turn, for the nation's future as a global maritime axis. In order to do that, we strive to improve in terms of product quality, production time, price, sales and management and continue doing so towards excellence.

We understand that quality and time are of the essence in the industry, therefore we strive to deliver every product with satisfactory result and punctuality. Every vessel is tailor-made based on its area of operation and usage, be it shipping, mining, oil & gas, marine services, offshore operation, government or ship brokerage. Furthermore, we pride ourselves in our ability to handle and solve problems whenever and wherever our service is needed, providing an excellent, complete customer experience. Since our start in 2011, we have successfully completed various project ranging from new building to Repair of vessels with exceptional quality, timely delivery and suitability with customers' needs. Experience is the key; it is what we bring in the beginning of each project and also what we take by the end. That way we are able to excel in every project and at the same time improve from one to another.

Marine and Shipyard Industries in Batam

KARYA TEKNIK UTAMA

“PT Karya Teknik Utama has been in the marine industry for more than 30 years. The company was first established in 1983, starting as a marine workshop in Jakarta”.

KTU has been in the marine industry for more than 30 years. The company was first established in 1983, starting as a marine workshop at Jalan Kakap in Jakarta. A shipyard in Marunda was soon acquired, initially focused on wooden fishing vessels. KTU progressed and built another shipyard at Sagulung in 1990 and Sekupang in 1992, both located in Batam. This rapid growth is due to strong demand in KTU products. Both shipyards were supported by a wide range of facilities, skilled workforce and extensive area to construct ships of international standards. KTU grew quickly and soon plays a significant role in the Indonesian ship-building industry.

SEKUPANG MAKMUR ABADI

PT. Sekupang Makmur Abadi was established in 1984 (formerly known as PT. Senawangi Wisamarta Utama) offering services originally to support Oil and Gas industry, Marine and Offshore Supply Base etc.

Responding the economic changes and market trends, the company has broaden it's customer base to include manufacturing and fabrication companies. Services have also broaden to include logistics services for onshore and offshore drilling activities. (Bird Eye Sekupang Logistics View [Click Here](#)) In the 2004, the company has become a Bonded Zone Area, providing faster and more efficient transfer of goods for the customers.

In the 2007, the company has developed its services which is not only for warehousing and services accumulation but towards the developing of a better marine businesses, such as fabrication and ship building and/or repairs.

By utilizing highly potential coastline for maritime activities, then the company developed their jetty/wharf to accommodate the activities of loading/unloading and the others. In the 2015, the company's obtained the license from Indonesia's Government to operate the region as a Customs Area.

PT. TIGER TRANS INTERNATIONAL

TIGER TRANS

Since 1997, Tiger Trans International Pte Ltd was established to address the needs of the ever growing traffic of cargo to and from Batam Island, Indonesia.

When the Singapore-Johor-Batam idea was mooted years ago, many thought that this triumvirate would flourish into an economic potential and it did. With the South East Asian economies thriving, the need for co-operation between the three countries become essential.

Since the historic partnership began, cargo traffic has flourished tremendously. Tiger Trans was formed not only to meet these needs but also help to develop it.

BANGUN ADHYABAHAN PERKASA

We are the owner and operator of a Marine Base & Fabrication Yard located in Batu Ampar, Batam, Indonesia. Established in 2002, the yard is part of Utraco Group and is managed by its wholly-owned Indonesian subsidiary;

PT. Bangun Adyabahan Perkasa. Located next to the J. Ray McDermott yard and designed as a multi-user facility, the yard occupies a site area of approximately 70,000 square meters, and comprising warehouses and workshops, open storage/ fabrication yard and private jetty. Since 2002, the yard has served as a marine base for the oil & gas industry and has provided logistical support to oil companies, offshore contractors, ship owners and equipment manufacturers.

In 2007, Utraco Group set up Utraco Marine And Offshore Pte Ltd as its fabrication arm. Utraco Marine And Offshore Pte Ltd specializes in the manufacture of pressure vessels, process skids, modules and general heavy structures, further addressing the needs of the groups customers in the oil & gas industry.

CLADTEK BI METAL MANUFACTURING

Cladtek is the largest supplier of weld overlay Corrosion Resistant Alloy (CRA) pipe in the world today, and a leading supplier of CRA mechanically lined pipe (MLP).

From humble beginnings 12 years ago, our products are now in service around the globe and with some of the world's largest and most respected organisations including Adnoc Group, Aramco, Chevron, Exxon, Petrobras and Shell.

We have production facilities in Batam, Indonesia, and in Rio De Janeiro, Brazil, and are in process of establishing facilities in Saudi Arabia. These facilities not only give us truly global and cost effective manufacturing capability, they also demonstrate the commitment that Cladtek has made to the regions in which we work, and our customers.

Cladtek is ISO 9001/API Q1 certified and holds API 5LC (Lic 0019) and API 5LD (Lic 0007). We also carry U, U2 and R stamp certification and API 6A and 6D certification for valves and flanges. Our commitment to quality is reflected in our continuing investment in new equipment and methods for quality assurance and control.

PT. Anggrek Hitam

ANGGREK HITAM

PT Anggrek Hitam was founded in 2008 by an international team with over 40 years of experience in international maritime. Equipped with 4 building berths, the shipyard has access to 300m deep-sea frontage that allows efficient shipbuilding operations, along with supplemental steel-fabrication activities.

The organization is founded independently and established fully-supported by a Singapore-based parent company and driven by the ownership of Indonesian citizens. The first vessel contract secured by PT Anggrek Hitam was a Deck Cargo Ship with capacity amounting at 12,000 Dead Weight Tonnes.

The organization has also gained recognition and assurance through numerous Certifications and Licenses, one of which is ISO 9001:2008 – Quality Management System awarded, certified by RINA & CISQ/IQNET, and certified by Hamburg-based Germanischer Lloyd.

As of August 2014, the organization reached 2,000,000 man-hours without any lost time injury (LTI). And to date, the organization has contracted over USD 130mn worth of deliveries.

To achieve those objectives, the Company is involved in the business activities of manufacturing, providing services, repairing equipment and accessories to support oil and gas industry.

On November 28, 1989 the Company listed its shares in Indonesian Stock Exchanges (formerly Jakarta Stock Exchanges and Surabaya Stock Exchanges).

Since September 20, 2013, total Company's registered shares has become 800,371,500 with par value of Rp 100 (one hundred Rupiah). The increase of shares was due to Management Stock Option Program and Employee Stock Option Program (MSOP & ESOP).

From the MSOP & ESOP programs, the total rights option executed was 371,500 (three hundred seventy one thousand and five hundred) shares, therefore the Issued and Fully Paid-up Capital of the Company from Rp 80,000,000,000 (eighty billion Rupiah) became Rp 80,037,150,000 (eighty billion thirty seven million one hundred and fifty thousand Rupiah) after the MSOP & ESOP programs.

CITRA LAUTAN TEDUH

PT. Citra Lautan Teduh was established on Batam Indonesia Island in 1991, is a joint venture between PUMYANG Construction Co. Ltd (South Korea) with PT. CITRA HARAPAN ABADI (Indonesia).

The business sector that is managed is manufacturing (Pre-Pressed Concrete Piles) or PRE-TENSIONED SPUN CONCRETE PILE with the trademark "TEKCON" (Technical Conrete). The prestressed rotary concrete pile is one of the pile materials used for construction of deep foundations that are used for various types of buildings such as buildings, ports, bridges, oil tanks and other buildings.

The factory, which was established on an area of 260,000 m², has machines, including: one Cutting machine, one Heading machine, three Caging Machines, Batching Plant, one pouring machine, two Tension machines, three Spinning machines, two Boiler machines, eight steam rooms, six overhead cranes and other facilities. This factory has a production capacity of 100,000 tons per year.

Prestressed rotary concrete piles are produced with strict control of quality using testing facilities and production processes that adhere to existing international standards. The Pile produced is to meet the development needs in the State of Singapore, Malaysia, Brunei Darussalam, as well as in the country, especially the Riau Islands, Sumatra Island and Batam Island.

PT. LABROY SHIPBUILDING ENGINEERING

LABROY SHIPBUILDING ENGINEERING

PT. LABROY SHIPBUILDING ENGINEERING owners are ex-owners of a reputable shipping and shipbuilding company since 1978. They had built and delivered offshore supply vessels, tankers, cement carriers and rigs from the 2 shipyards in Batam island which the company was sold in 2008. In 2012, the owner acquired and started the construction of this new yard at Batam island.

PT. LABROY SHIPBUILDING ENGINEERING occupies a land area of 19 hectares (190.000 square meters) with 470 meters of water frontage and water depth up to 15 meters and a vessel building berth that can cater vessels up to 180 meters in length.

This new yard is also gearing up its facilities and resources to handle new building orders for more sophisticated vessels including offshore platforms such as liftboats and rigs as well as berthing repairs and as a strategic logistic base for ship owners.

PT. LABROY SHIPBUILDING ENGINEERING is an ISO 9001 : 2015 accredited shipyard.

Marine and Shipyard Industries in Batam

Sembcorp Marine provides innovative engineering solutions to the global offshore, marine and energy industries. Drawing upon more than 50 years of track record and an extensive network of facilities and expertise, the Group focuses on four key capabilities, namely, Rigs & Floaters; Repairs & Upgrades; Offshore Platforms and Specialised Shipbuilding.

Sembcorp Marine operates shipyards strategically located in Singapore, Indonesia, the United Kingdom and Brazil. Its customers include major oil companies, drilling contractors, shipping companies as well as owners and operators of floating production units.

By delivering innovative solutions that often redefine the possibilities of offshore, marine and energy technologies, Sembcorp Marine achieves successful and sustainable outcomes for its customers – regardless of the scale, complexity and location of the projects.
